How does sitePilot Email Campaign Manager work?

This is an ASP hosted email solution, which means that it is provided online and on demand.

Admin Access is provided online through a secure login, allowing you to manage email campaigns in real-time from any workstation with access to the web.

Email Campaign Manager streamlines your email marketing processes. It allows you to create an email campaign based on specific message content and/or target audiences, compose strategic messages within pre-approved templates, upload your prospect and existing customer group lists, and then schedule the emails for delivery, within a matter of minutes.

The system comes with built-in email-tracking technology, allowing you to generate detailed reporting on campaign responses, such as customer interaction with embedded hyperlinks.

Product Features

WYSIWYG Email editor

Compose personalized messages using professional templates developed by Shrinking Planet's design team. Input text manually or paste it in, upload graphics, and create track-able hyperlinks.

Campaigns

Create an email campaign based on specific message content and target audiences.

Contact list manager

Import contacts from a database or CRM application, or add them one at a time. You can also add, edit, and remove contact profiles from lists to generate highly targeted campaigns.

Real-time reports

Generate real-time reports to track the number of successful sends, which emails were opened, which hyperlinks were clicked, and which email addresses were invalid.
